When YOU Build DEMAND  
"Southland" Lumber  
AND BUILD FOR KEEPS

You want a home that will last for years that will hold its point, that you will be pleased with as long as you live. You will look "run down" and in constant need of repair in a few months. Why not look into this building proposition like you would any other. Find out something about lumber. Most people only build one home in a life time, so they would give more thought to the material that goes in their home.

Don't just think "I want to lumber." Demand "Southland Lumber" in YOUR HOME.
